Figure 1. A schematic diagram of the experimental setup. The subject is seated in a chair and views the screen through a mirror. The screen displays the target (a red dot) and the starting position (a black dot). The subject's hand is positioned at the starting position. The distance between the starting position and the target is 10 cm. The subject is instructed to move the hand to the target as quickly and accurately as possible. The time taken for the hand to reach the target is recorded. The experiment is repeated for 10 trials. The average time is calculated. The subject is then instructed to move the hand to the target as quickly and accurately as possible. The time taken for the hand to reach the target is recorded.
